## SERVICE PACKAGE

# AI & IT Diagnostic Sprint

A fixed-scope, fixed-price engagement to find out exactly where AI-native workflows can cut your IT costs — before you commit to anything bigger.

## WHO IT'S FOR

Companies that suspect their IT spend is inefficient but have no independent, senior technical assessment to act on. No commitment beyond the sprint.

## WHAT'S INCLUDED

- ✓ Review of current dev stack, workflows and team structure
- ✓ Identification of manual/repetitive work that AI-native tooling could remove
- ✓ A prioritized roadmap: quick wins (weeks) vs. structural changes (months)
- ✓ One executive readout session with findings and recommendations

**Why it matters:** Low risk, fast turnaround, gives you something concrete even if you go no further — and it's the natural first step into the 30% IT Savings Program.
